1 INTRODUCTION

Part 1 provides key context about the Carman Dufferin Grey Planning District that was used to inform this Development Plan.

1.1 PURPOSE AND INTENT

A development plan is a statutory planning tool used by the public, the development community, Municipal Councils, the Planning District Board, and the provincial government. It defines an overarching vision for how, where, and when development should occur within a community. A development plan sets goals, objectives and policies to achieve this vision, and is the cornerstone from which planning and development decisions are made. The purpose of a development plan is to guide decision making respecting development, land use, conservation, essential services and infrastructure provision, and environmental stewardship.

The Carman Dufferin Grey District Development Plan (the Development Plan or Plan) contains policies on land use, transportation, recreation, economic activity, and the environment as they relate to growth and development. As the strategic planning document for the Carman Dufferin Grey Planning District (CDG Planning District or the Planning District), this Development Plan provides clear direction to manage growth and development in a sustainable manner, while honouring the identity and history of the Planning District.

1.2 ENABLING LEGISLATION AND REGULATION

Municipal land use planning has its basis in *The Planning Act* of Manitoba, which makes provision for the preparation and adoption of development plans and zoning by-laws to guide and promote growth within a municipality or planning district. All development plans adopted in Manitoba must also be generally consistent with the *Provincial Planning Regulation*, specifically the Provincial Land Use Policies (PLUPs) contained within the *Regulation*. Both *The Planning Act* and the *Provincial Planning Regulation* are briefly detailed in turn, as follows:

The Planning Act

1.2.1 This Development Plan has been prepared in accordance with *The Planning Act*, which states a Development Plan must:

1. set out the plans and policies of the planning district or municipality respecting its purposes and its physical, social, environmental and economic objectives;
2. through maps and statements of objectives, direct sustainable land use and development in the planning district or municipality;
3. set out measures for implementing the plan; and
4. include such other matters as the minister or the Board considers advisable.

Provincial Planning Regulation

1.2.2 The *Provincial Planning Regulation* provides guidance as to how land use planning and development should occur in Manitoba, and what a development plan should contain. This Development Plan is generally consistent with the PLUPs while being sensitive to the planning context of the Planning District. Once approved and adopted, this Development Plan replaces the PLUPs.

1.3 BACKGROUND

Comprised of the Town of Carman, the Rural Municipality of Dufferin, and the Rural Municipality of Grey, the Carman Dufferin Grey Planning District came into effect in 2022. Prior to this, the Carman-Dufferin Planning District was formed on January 1, 2013, and the Grey-St. Claude Planning District was established on May 2, 1998.

1.4 VISION AND PLANNING GOALS

Vision

The Carman Dufferin Grey Planning District will be a thriving, diverse, and environmentally sustainable community that celebrates its rich agricultural heritage, robust economy, vibrant urban centres, and bloomin' rural character. The Carman Dufferin Grey Planning District will continue to strive towards being an age-friendly community that is accessible, active, and enduring for generations to come.

Planning Goals

1.4.1 To rationalize the vision, the following goals were identified during the Development Plan review process to inform objectives and policies contained within this Plan.

GOAL ONE:

CREATE COMPLETE AND COMPACT COMMUNITIES

Creating complete communities that are compact and ensuring that growth is managed efficiently to protect environmental quality and preserve agricultural lands have been identified as priorities to guide growth and development in the Planning District. To achieve these priorities, this Development Plan encourages future growth to occur in either the Town of Carman, the Local Urban Districts (LUDs) of St. Claude, Elm Creek, or Haywood, or the unincorporated villages of Roseisle, Graysville and Homewood. These urban settlement centres are better positioned to offer a broader range of services and amenities, a greater diversity of housing options, and convenient access to where people can live, work, shop and play. This Development Plan supports continued growth in these urban settlement centres, representing an efficient use of existing infrastructure and services.

GOAL TWO:

PROMOTE SUSTAINABLE AGRICULTURE

Agricultural and natural environments are important assets that contribute to the quality of life, economic resilience, and sense of place within the Planning District. A rich agricultural heritage, productive soils, and numerous agricultural enterprises have shaped the Planning District into what it is today and will continue to shape its future. To protect the Planning District's agricultural and natural

assets, this Development Plan contains policies promoting sustainable agricultural land use and development.

**GOAL THREE:
MANAGE RURAL RESIDENTIAL DEVELOPMENT**

Many of the single-unit building permits issued in the RMs of Dufferin and Grey can be attributed to a rural residential development pattern within the Planning District. This Plan provides policies promoting a more compact growth model that can be effective in addressing issues associated with rural residential sustainability, while continuing to provide a choice and variety of housing options within the Planning District.

**GOAL FOUR:
PLAN COLLABORATIVELY BETWEEN BOUNDARIES**

Building partnerships between the Town of Carman, the RM of Dufferin, the RM of Grey, and adjoining municipalities will expand the economic potential of the Planning District, but requires vision and leadership. This Development Plan provides policy mechanisms that allow for logical growth and development to occur over municipal boundaries and encourages a cooperative approach to inter-municipal development within the surrounding region.

**GOAL FIVE:
PLAN SUSTAINABLY**

Planning sustainably has been identified as a priority to guide future development within the Planning District. Embedded in this goal are the three Es of sustainable development - Environment, Economy, and Equity. As sustainability includes planning for climate change and reducing GHG emissions, this Development Plan promotes a compact land use pattern that makes efficient use of existing infrastructure, encourages energy efficient design, and promotes alternatives to vehicular modes of transportation.

**GOAL SIX:
PLAN FOR ACTIVE AND CONNECTED COMMUNITIES**

Communities with a variety of parks, recreation, and natural areas have many economic, ecological, and social benefits. Parks improve residents' physical and psychological health, strengthen communities, and make neighborhoods more attractive and vibrant places to live, work, and play. This Development Plan protects existing parks and recreation uses and makes provision for the continued expansion of active transportation networks such as the Community Pathway, as well as future parks and recreation uses.

**GOAL SEVEN:
PLAN FOR AGE-FRIENDLY COMMUNITIES**

Creating age-friendly communities involves respecting, supporting, and planning for residents of all ages and abilities. Ensuring that communities are accessible, safe, equitable, and making the appropriate provisions for seniors to age in place are important planning considerations. This Development Plan recognizes that the Town of Carman continues to be the retirement centre of choice within the region and encourages age-friendly planning and development principles throughout the

Planning District.

GOAL EIGHT: PLAN FOR A ROBUST AND DIVERSE ECONOMY

Economic development has been identified as a top priority for the Planning District. Economic development goes hand in hand with the availability of services, vibrant residential and commercial sectors, recreational opportunities, and environmental protection. To foster continued economic growth, this Development Plan designates land for commercial and industrial purposes at key locations throughout the Planning District.

1.5 CONTEXT

This Development Plan recognizes the distinct context of the Planning District. The overarching vision, goals and policy direction provided herein are cultivated from an understanding of the Planning District's unique context. The context described in the following paragraphs was informed by a background study which reviewed municipal and geographic context, population and demographics, economic and development activity, infrastructure and municipal services, and existing development patterns. It was also informed by a strategic planning framework which outlined a variety of goals and objectives to guide and shape this Development Plan.

Context was also largely shaped by obtaining input from a variety of stakeholders including Planning District Board members, residents from member municipalities, the Town of Carman Council, the RM of Dufferin Council, and the RM of Grey Council, administration from the three municipalities, and provincial agencies and departments.

Regional Context

The Planning District is located at the centre of Canada's farming heartland in south-central Manitoba. The Planning District lies at the northern end of the Pembina Region and is bordered by eight Rural Municipalities including: The RM of Macdonald, the RM of Morris, the RM of Roland, the RM of Thompson, the RM of Lorne, the RM of Norfolk Treherne, the RM of Portage La Prairie, and the RM of Cartier. In 2021, these surrounding rural municipalities had a combined population of approximately 28,738 compared to the Planning District's population of approximately 8,266 (Population of 3,206 for the Town of Carman, Population of 2,543 for the RM of Dufferin, and Population of 2,517 for the RM of Grey). The Town of Carman is well positioned as the service centre for this region, providing a range of educational, social, commercial, and health services. The LUDs of Elm Creek and St. Claude also provide a range of services for residents within the Planning District. Further, the diversity of the employment sector and the overall health of the agricultural sector remains strong and providing a solid foundation for growth and development.

Land Use Context

Land use in the Planning District is primarily agricultural. In the Carman Dufferin region, annual crops occupy approximately 74% of the land, and the remaining land areas are in Deciduous Forest (7%), Grassland (10%), and Forage Crops (2%) most of which are used for livestock production. The remainder (6%) is being used for various non-agricultural, non-natural applications such as urban and transportation uses. In a similar way, in the RM of Grey, annual crops occupy approximately 67% of

the land, and the remaining land areas are in Forage (6.4%), Grasslands (14.2%), Trees (8.1%), and Wetlands (0.2%), with the remaining 4% being used for urban and transportation uses.

The majority of growth that has occurred in the Planning District has been in the Town of Carman, the unincorporated villages of Roseisle, Graysville, and Homewood, and the Local Urban Districts (LUDs) of St. Claude, Elm Creek, and Haywood. This settlement pattern has resulted in a fairly compact land-use pattern. Future growth in the Town of Carman, the unincorporated villages in the RM of Dufferin, and the LUDs in the RM of Grey should be focused away from prime agricultural lands wherever possible.

Heritage and Historical Context

The Town of Carman, the RM of Dufferin, and the RM of Grey have rich heritages that are unique, yet often shared. The Dufferin Historical Museum is dedicated to this shared heritage and is located at the corner of King's Park Road and Provincial Road (PR) 245 in the Town of Carman. The Planning District is home to approximately 144 historic sites as recognized by the Manitoba Historical Society. The Town of Carman, the RM of Dufferin, and the RM of Grey are committed to celebrating and protecting their heritage resources for future generations. Since 2010, the Carman Dufferin Grey Municipal Heritage Advisory Committee (MHAC) has combined efforts to create a Resource Management Plan, with its most recent edition being the 2022-24 Plan.

Socio-Demographic Context

The Town of Carman, the RM of Dufferin, and the RM of Grey have all been trending towards an aging population. Despite this trend, with a median age of 34.8, the RM of Dufferin's population has one of the lowest median ages in the region followed by the RM of Grey in the district with a median age of 38.8. Part of the trend towards an aging population in the Town of Carman may be the result of residents in the region choosing the Town as a retirement centre because of the access to health, commercial services, and other amenities that it offers. The trend towards an aging population will require a younger, local population to provide these services. A younger population in the RMs of Dufferin and Grey and the surrounding region will be key to providing services to an aging population within the Town of Carman. Retaining a younger population can be a positive indicator of increased employment opportunities and affordable housing alternatives for this sector of the population.

Within the Planning District, the Town of Carman has the largest population (3,114 residents in 2021) and has experienced the highest growth rate when compared to member municipalities at 3.1% per census period between 1991 and 2021.

In contrast, the RM of Grey has experienced population decline during the same time period. While both the Town of Carman and the RM of Grey had a declining population within the most recent census period (2016-2021), the RM of Dufferin experienced a population increase of 4.4%, just below the provincial average 5-year growth rate of 5%. Population projections for low, medium, and high growth scenarios in the Planning District have been calculated using each municipality's annual or median growth rate.

Annual growth rates were calculated at 0.62% for the Town of Carman and 0.2% for the RM of Dufferin. The median growth rate calculated for the RM of Grey is -0.12%, indicating decline. However, given

that the RM of Grey has since been incorporated into the Carman Dufferin Grey Planning District, it is reasonable to assume that the RM of Grey will grow at similar rates as the other municipalities within the District. Therefore, in order to calculate the RM of Grey's low, medium, and high population projection scenarios, the RM of Dufferin's growth rate of 0.2% has been applied to the RM of Grey.

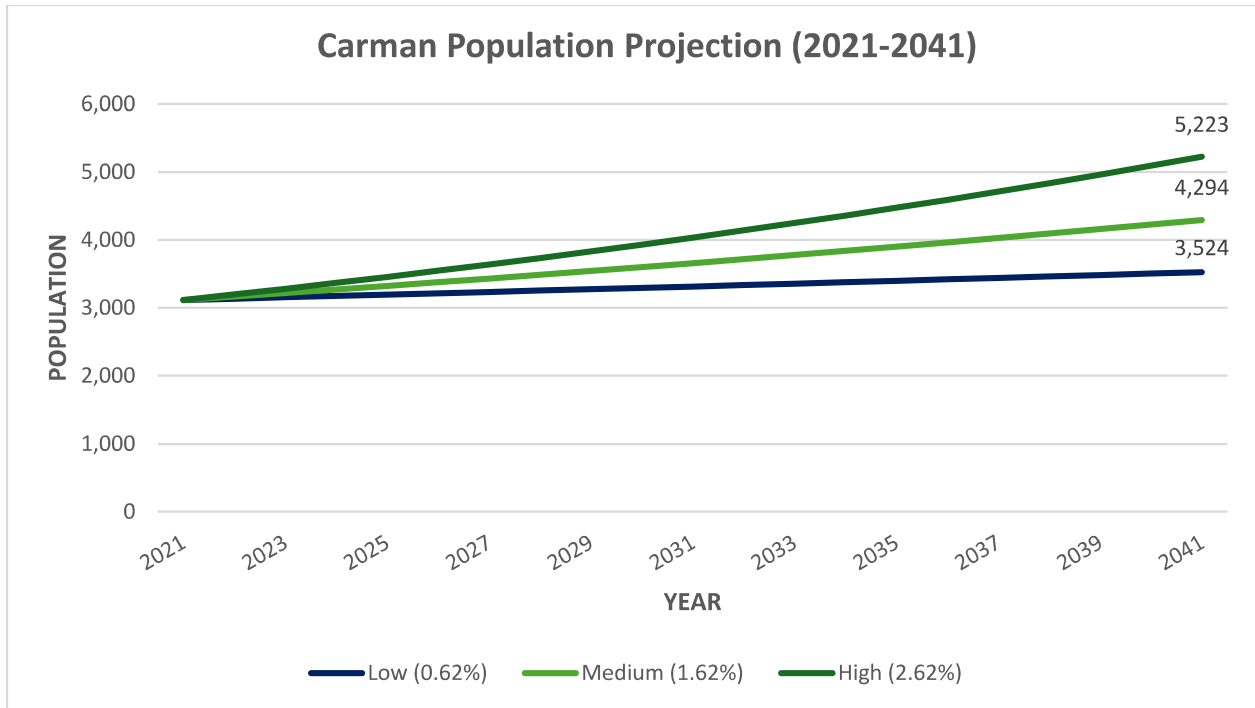

Figure 1: Town of Carman population projection

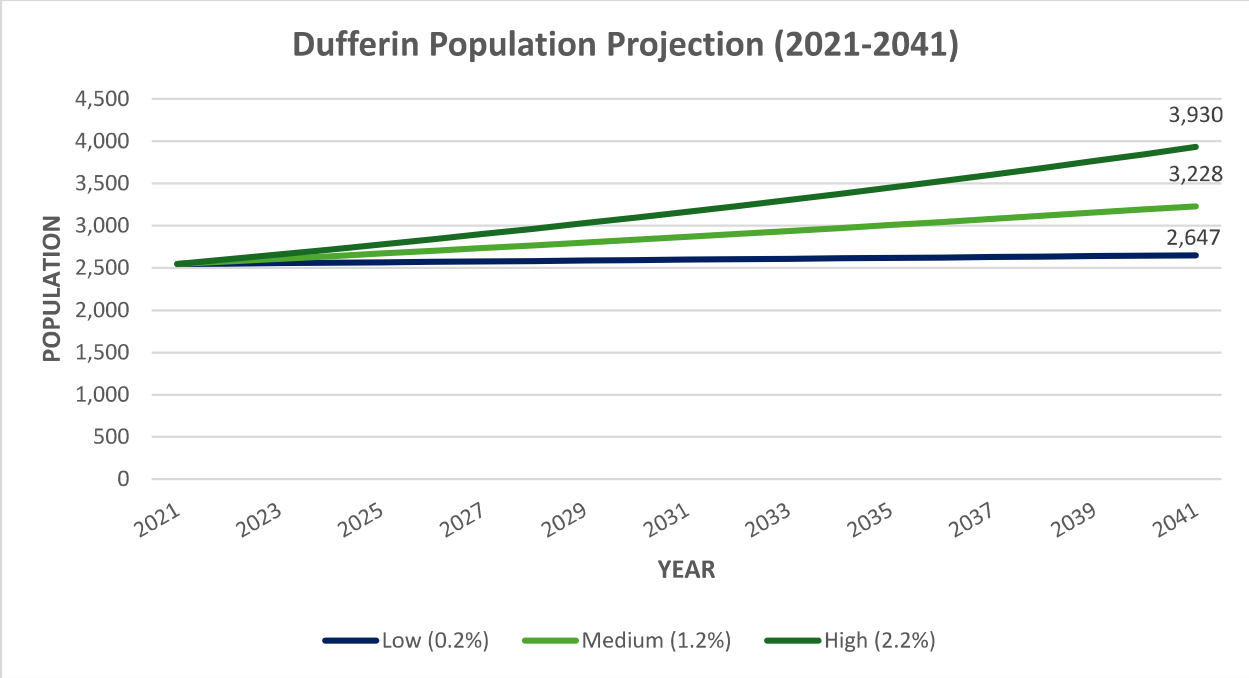

Figure 2: RM of Dufferin population projection

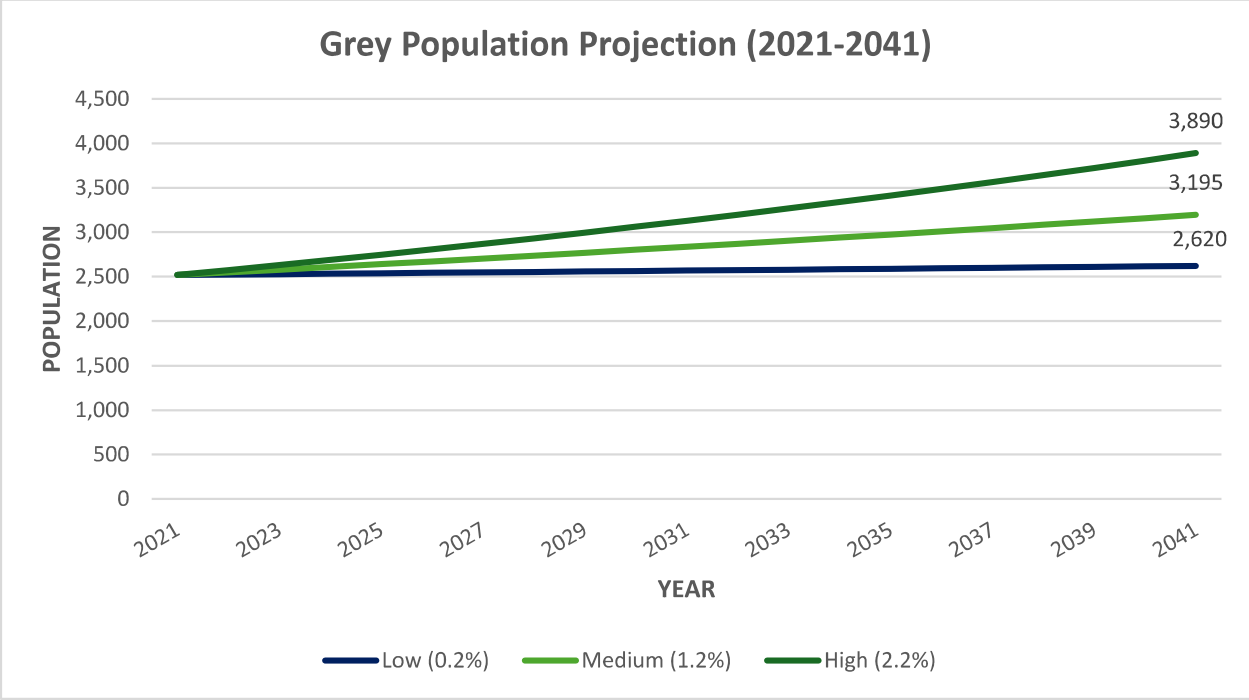

Figure 3: RM of Grey population projection

Economic Context

Within the Planning District, “agriculture, forestry, fishing and hunting” is the dominant employment sector. As such, agricultural uses should be protected and preserved to ensure the sector’s long-term viability. In comparison, “agriculture, forestry, fishing, and hunting” is a less significant employment sector in the Town of Carman, with only 5.6% of the town’s population participating in the industry. The diversity of the employment sector in the Town of Carman is reflective of its position as the service and retail centre within the Planning District, as well as of the preferred location of the aging portion of the region’s population. The provisions contained in this Development Plan will help enable the Planning District to attract business and industry, and to provide a variety of housing types and tenures to support the needs of an aging population.

Environmental Context

The Planning District functions within several larger physiographic regions, including the Lower Assiniboine Delta, the Red River Valley, and the Pembina Escarpment. These regions shape the natural environment of the Planning District and contribute to its agricultural nature. One of the most significant challenges facing the Planning District in years to come may be the threat of climate change, and the need to mitigate and adapt to potential change. Extreme weather events and difficulty growing certain crops pose an immediate threat to the Planning District’s agricultural base. This Development Plan articulates the environmental context of the Planning District and proactively addresses potential threats of climate change through appropriate land use and development policies.

Agricultural Context

The Planning District is comprised of approximately 84% prime agricultural land (Classes 1, 2 and 3), with the majority of Class 1 lands located around the Town of Carman, or in the south-central portion of the Planning District. The northwestern portion of the Planning District contains the lowest class lands, generally ranging from Class 4 – Class 6, with a few Class 7 portions in the northwest limit of the RM of Grey. The Planning District is home to a diverse range of agricultural activities, including livestock operations. To limit potential land use conflicts, the location of these operations has been considered in this Development Plan, and will directly influence the potential re-designation of lands in the future. The agricultural policies contained within this Development Plan are in compliance with the provisions for livestock set forth in the *Provincial Planning Regulation*.

Services and Infrastructure Context

The Carman Dufferin Grey Planning District is a full-service community with health, educational, and emergency services. The Planning District also boasts a wide variety of recreational opportunities and infrastructure, providing residents with all-season recreation options. With regards to the Planning District’s transportation infrastructure, Manitoba’s regional transportation corridors play an important economic role connecting the region to markets outside of Manitoba. The regional transportation routes are centrally located within the Planning District and converge on the Town of Carman from all directions. There are three Provincial Trunk Highways (PTHs) that service the District, namely PTH #13 which runs north/south, PTH #3 which runs east/west through the Town of Carman, and PTH #2 (Red Coat Trail) which runs east/west connecting the communities of Fannystelle, Culross, Elm Creek, Haywood, and St. Claude. In addition to the three PTHs, the District has several Provincial Roads

(PRs) that connect the Planning District with adjacent rural municipalities. These PRs include: 240, 245, 247, 248, 305, 334, and 338. PR 245 is an important inter-community transportation route within the Planning District, connecting the unincorporated villages of Roseisle and Graysville to the Town of Carman and both PTH #3 and #13.

1.6 DEVELOPMENT PLAN STRUCTURE

This Development Plan is comprised of five inter-related parts. Each part provides information and direction with regards to land use decisions in the Planning District. A description of the parts contained within this Development Plan is as follows:

Part One: Introduction

This Part provides an overview of the Planning District, discusses background information, planning context, sets goals and provides a vision for how development should occur.

Part Two: General Policies

The general policies contained within Part Two apply to all designated land use policy areas as identified in Part Three of this Development Plan.

Part Three: Land Use Policies

This Part provides objectives and policies to guide land use and development within the Planning District. Objectives and policies contained within this Part are supported by the land use maps found in Part Five.

Part Four: Implementation

This Part provides an overview of the available tools used to implement this Development Plan.

Part Five: Land Use Maps

The land use maps within this Part denote the location of designated land use policy areas as identified in Part Three of this Development Plan.

1.7 HOW TO USE THE DEVELOPMENT PLAN

The Carman Dufferin Grey District Development Plan provides a roadmap to guide future decisions made by the Planning District Board and local Councils. The Development Plan contains objectives, which are intended to inform and provide context for the policy statements.

The Development Plan also contains policy maps. The policy maps contained in Part Five spatially illustrate the policy areas affected by policy statements. The following is a general guide intended to assist the reader in navigating this Development Plan in relation to a proposed development, a proposal, or particular issue:

Step One:

Review the Land Use Maps in Part Five to determine how the subject land is designated;

Step Two:

Review the policies in Part Three in relation to the subject lands current and proposed designation;

Step Three:

Review the general policies in Part Two;

Step Four:

Evaluate the proposal based upon all the policies in the Development Plan and make an assessment as to whether a given project or proposal conforms to the intent, objectives and policies herein.

2 GENERAL POLICIES

Part 2 defines the objectives and policies applicable to all land use and development within the Planning District. In addition to the policy provisions contained in Part 3 that are applied to specific land use areas, the objectives and policies contained herein should be reviewed with respect to all proposed development.

2.1 SUSTAINABLE AND RESILIENT COMMUNITIES

Objectives

- 2.1.1 To consider the three Es of sustainable development (Environment, Economy, and Equity) within the context of land use and development.
- 2.1.2 To proactively address potential threats of climate change through sustainable building construction, development, and planning practices.

Policies

The following policies support sustainable land use and development in the Planning District:

- 2.1.3 Water and energy conservation through use of low-flush toilets, and the use of energy efficient appliances will be encouraged for all new buildings and retrofits to existing structures.
- 2.1.4 Building and site configurations are encouraged to take advantage of passive solar orientation.
- 2.1.5 The use of renewable energy sources such as solar, wind and geothermal will be encouraged for all new and retrofitted buildings.
- 2.1.6 To reduce transportation energy use, a compact and integrated development pattern that makes provision for a variety of active transportation options will be encouraged for all new development.
- 2.1.7 Where possible, the use of district energy systems should be considered to reduce community scale energy use and promote a compact and energy efficient approach to land use and development.

2.2 AGE-FRIENDLY DEVELOPMENT

Objectives

- 2.2.1 To ensure that private and public spaces, both indoor and outdoor, are universally accessible and free of barriers that limit opportunities for individuals with disabilities to participate actively in society or to access vital health and social services.
- 2.2.2 To provide safe and accessible roadways, sidewalks, and paths that are well-kept, with quality urban design and signage that is understandable and promotes easy wayfinding.

Policies

The following policies shall guide development with respect to age-friendly development within the Planning District:

- 2.2.3 The Planning District shall continue to actively work with the Age Friendly Manitoba initiative to pursue age-friendly planning and development solutions.
- 2.2.4 The Planning District shall encourage universal design measures for all development in the public and private realms.

2.3 WATERWAYS

Objective

- 2.3.1 To protect the riparian areas adjacent to natural waterways and water bodies within the Planning District.

Policies

The following policies shall guide development with respect to waterways and water bodies within the Planning District:

- 2.3.2 Development will adhere to the regulations under The Water Protection Act and will be encouraged to develop in a manner that ensures that waterways and the limited groundwater resources are sustained.
- 2.3.3 Land subject to significant flooding, erosion or bank instability should be left in its natural state or only developed for low intensity uses such as open space recreation, grazing, cropping, forestry and wildlife habitat.
 - 1. Lands subject to flooding refers to all lands which would be flooded by the 200-year flood or by a recorded flood exceeding the 200-year flood.
 - 2. Lands subject to erosion refers to all lands which would, within a 50-year period, be eroded or become unstable due to the action of water contained in an adjacent waterway or water body.
 - 3. Lands subject to bank instability refer to those lands where actual effects of such hazards have occurred or have been predicted.
 - 4. In areas where the specific hazard has not been determined, buildings shall be set back from all waterways a distance of at least 10 times the height of the bank above channel grade or 30.5 m (100 ft), whichever is greater, unless an engineering investigation shows that these limits may be reduced.

- 2.3.4 A minimum 100-foot buffer shall be established in flood protected areas within the town of Carman measured from the upslope from the normal high water mark adjacent to either side of the Boyne River. A 100-foot buffer shall also be established in the RMs of Dufferin and Grey measured from the normal high water mark adjacent to either side of the Boyne River and the Stephenfield Reservoir.
- 2.3.5 New development within the 100-foot buffer area will not be supported in the Town of Carman, and development within the 100-foot buffer area will not be supported in the RMs of Dufferin or Grey.
- 2.3.6 Development shall be directed away from all lands which would, within a 50 year period, be eroded or become unstable due to the action of water contained in an adjacent waterway or water body, unless proven otherwise by a geotechnical report from an engineering investigation shows these limits may be reduced.
- 2.3.7 Any new non-farm developments, including the building of permanent structures, should be directed away from provincial water infrastructure (PWI) lands including but not limited to that of Stephenfield Dam and Reservoir.
- 2.3.8 The buffers limiting development adjacent to waterways and water bodies established in 2.3.4 and 2.3.5 may be reduced subject to proper geotechnical, engineering, or environmental assessment by a professional engineer, at the discretion of the Planning District Board, and/or the applicable provincial authority. Notwithstanding the buffers established in 2.3.4, and the constraints established in 2.3.5, all new development within the boundary of the Stephenfield Designated Reservoir Area as indicated on the Province of Manitoba Plan Number 13-1-1206 is subject to adherence with all applicable provincial regulations and legislation.
- 2.3.9 The preservation of native vegetation shall be preserved in sensitive riparian areas within the buffer areas adjacent to waterways or water bodies in order to provide river bank stability, filter run-off, and to promote improved surface water quality.
- 2.3.10 Planting of native plant species within the buffer area will be encouraged.
- 2.3.11 Active transportation networks such as the Community Pathway, trails, and connections will be encouraged within the buffer area.
- 2.3.12 Where possible, and at the discretion of the Planning District Board, the buffer area is to be registered as a public reserve on title for public purposes as part of the subdivision process.

2.4 SURFACE AND GROUNDWATER

Objective

- 2.4.1 To protect surface and groundwater within the Planning District.

Policies

The following policies shall guide development with respect to surface and groundwater within the Planning District:

- 2.4.2 Intensive development requiring significant water consumption shall be permitted only in areas where they will not cause a reduction in water supply for existing users and/or do not require the unnecessary expansion of existing water treatment and distribution infrastructure, requiring confirmation from the Pembina Valley Water Co-Op (PVWC). If groundwater is to be used as a source of water supply, it shall be done in a sustainable manner and compliant with applicable provincial regulations and legislation. Development proposals, including irrigation and livestock operations requiring more than 25,000 litres/day of self-supplied water, shall require a water rights license under the provisions of The Water Rights Act. All self-supplied industrial and community well distribution systems shall also require a water rights license.
- 2.4.3 Developments or activities that may cause pollution or impact public drinking water sources or fish or fish habitat under normal operating conditions or by accident will be directed away from major surface water bodies such as the Boyne River and the Stephenfield Reservoir. Where this is not feasible or practical, developments or activities, which could cause pollution or impact public drinking water sources or fish or fish habitat, may be considered adjacent to major surface water bodies provided:
1. It can be proven by adequate engineering or hydro-geological investigation that the proposed activity will not cause pollution of the surface or groundwater supply;
 2. Appropriate precautionary measures have been or will be taken to sufficiently mitigate the risk of endangering the quality of the water supply for domestic potable water supply purposes; or
 3. The Planning District Board has referred major developments proposed near waterways and water bodies to applicable provincial and federal authorities for review prior to approval.
- 2.4.4 Sources of public drinking water, including municipal wells, shall be protected from potential contamination in accordance with provincial regulation. Any additional restrictions imposed by the Planning District Board shall be based on demonstrated risk to water quality and consistent with provincial standards.

2.5 HERITAGE RESOURCES

Objective

To protect known heritage resources in the Planning District from incompatible development and land uses that may threaten their integrity or operation.

Policies

The following policies shall guide development with respect to heritage resources within the Planning District:

- 2.5.1 No development of land shall be permitted that will endanger any site or structure with historic, architectural, or archeological significance as designated by applicable provincial authority.

- 2.5.2 Sites with heritage potential will be considered for designation as a municipal heritage site as per applicable provincial regulations and legislation.
- 2.5.3 The Planning District Board shall encourage and facilitate the identification of heritage resources in the Planning District.
- 2.5.4 The Planning District Board shall endeavour to preserve and protect its heritage resources through the judicious use of statutory instruments such as the zoning by-laws, subdivision procedures, development permits, design by-laws and demolition by-laws.
- 2.5.5 The Planning District Board shall utilize the most recent Heritage Resource Management Plan for the District to identify, commemorate, and protect heritage resources and to provide a source of advice on heritage issues.

2.6 UTILITIES

Objective

- 2.6.1 To work collaboratively with utility companies on all land development issues to ensure the sustainable provision of services within the Planning District.

Policies

The following policies shall guide development with respect to utilities and provision of related services within the Planning District:

- 2.6.2 Essential activities of government and public and private utilities will be permitted in any land use designation subject to requirements of the zoning by-law. Such uses should be located and developed in a manner that will minimize any incompatibility with neighbouring land uses.
- 2.6.3 The Planning District Board shall continue to work closely with all utility companies in planning compatible land uses along existing and proposed utility corridors. Developments will be approved on the basis of maximizing the utilization of existing utility systems and distribution networks.
- 2.6.4 Existing public and private utilities should be protected from incompatible or potentially incompatible land uses that may threaten or adversely affect their operation.
- 2.6.5 Setback distances prescribed by regulators in and around oil and gas facilities shall be adhered to.

2.7 MUNICIPAL SERVICES AND INFRASTRUCTURE

Objectives

- 2.7.1 To ensure the provision of sustainable municipal services in the Planning District.
- 2.7.2 To promote water conservation and the economical and efficient delivery of municipal services in the Planning District.

Policies

The following policies shall guide development with respect to water, wastewater, solid waste management and provision of related services within the Planning District:

Water and Wastewater

- 2.7.3 All development shall protect drinking water sources within the Planning District, including the Stephenfield Reservoir and the Boyne River.
- 2.7.4 Land use patterns and development concepts that promote the provision of sustainable water and wastewater infrastructure shall be prioritized.
- 2.7.5 No new or expanded development shall be permitted in areas where essential services such as potable water supply, wastewater collection and disposal, storm water and drainage systems, public roadway access and communications cannot be provided or extended in a sustainable manner.
- 2.7.6 Where municipally operated water or wastewater services are provided within any developed area, new developments shall be required to connect to these services.
- 2.7.7 Where piped water or sewer services are not available in the Planning District, development should be planned to be able to accommodate efficient and economical piped water and sewer services in the future.
- 2.7.8 The extension and/or improvement of piped water and wastewater services should be implemented so as to service proposed development areas efficiently and economically. Development patterns shall be established, and developments approved in a manner that support district and regional solutions to water and wastewater service delivery.
- 2.7.9 Water supply and wastewater management systems, where provided, must be developed and operated in accordance with applicable provincial regulations and legislation.
- 2.7.10 Where new development is proposed, additional analysis may be required to determine the impact of development on existing and future infrastructure systems and related servicing requirements. This analysis may include, but is not limited to, storm water management plans, drainage study, soil suitability analysis, water modeling and treatment analysis, sewer capacity and/or sewage lagoon capacity analysis.
- 2.7.11 All onsite wastewater management systems proposed in the RMs of Dufferin and Grey shall ensure that the design and construction is suitable for the soil conditions and the lot size proposed for the development and shall comply with all applicable provincial regulations and legislation, and must be registered with the applicable provincial authority prior to installation.
- 2.7.12 Adequate buffer areas will be maintained around sewage treatment facilities wherein non-compatible land uses such as residential development will not be permitted. Minimum distance setbacks for residential dwellings will be established in the zoning by-law.

2.7.13 In order to minimize exposure to the undesirable effects of wastewater stabilization ponds and solid waste disposal sites, development in the vicinity of these facilities will be limited to agricultural, industrial and specific open space or recreational uses that would not be adversely affected by these facilities.

Solid Waste Management

2.7.14 The Planning District will encourage the provision of waste management programs such as recycling, composting, and provide facilities for household hazardous waste disposal.

2.8 DRAINAGE

Objective

To ensure drainage issues are addressed in a coordinated manner with input from government departments and agencies, and adjacent municipalities.

Policies

The following policies shall guide development with respect to drainage in the Planning District:

2.8.1 The Planning District will adhere to provincial drainage guidelines and work cooperatively with the applicable provincial authorities and adjacent municipalities to address any regional drainage issues.

2.8.2 Overall storm drainage plans for undeveloped areas may be required prior to development. Where development may increase storm flows into the provincial highway system, the applicable provincial authority will be consulted, and the cost of any improvements required to the existing highway drainage system directly associated with the development will be the responsibility of the developer.

2.9 TRANSPORTATION

Objectives

2.9.1 To provide and maintain safe and efficient vehicular transportation routes in the Planning District.

2.9.2 To establish a road hierarchy within the Planning District.

Policies

The following policies shall guide development with respect to roads and vehicular transportation networks within the Planning District:

Road Hierarchy

2.9.3 The Planning District is comprised of a road system that includes municipal roads and provincial roads and highways. Policies specific to both municipal and provincial roads are contained below in sections 2.9.4 to 2.9.12.

Arterial Roads

2.9.4 Arterial roads are designed for large traffic volumes and high speed limits. Provincial Roads (PRs) and Provincial Trunk Highways (PTHs) are considered arterials within urban centres. Direct access to arterials should be via collector roads, and private driveways or access points should be limited. Any new access or change to existing access to a declared provincial highway requires a permit from Manitoba Transportation and Infrastructure (MTI).

Collector Roads

2.9.5 Collector roads are designed to collect traffic from local roads and distribute this traffic to arterial roads. Access to collector roads should be via local roads and private driveways or access points should be limited.

Local Roads

2.9.6 Local roads are designed for low traffic volumes and speed limits. They connect private properties such as those located in the **Residential Policy Areas** with collector roads. Connections between new local roads and arterial roads should be avoided. Local roads represent the majority of municipal roads in urban centres.

Municipal Roads

2.9.7 New development shall have access to an existing all-weather road of sufficient standard and capacity, unless the proponent makes an agreement with the municipality to upgrade an existing road or develop new road access to a standard agreed upon by the municipality. The proponent may be responsible for part or all of the costs of this roadway construction and maintenance.

2.9.8 A setback distance for all buildings, structures, hedges, or similar obstructions adjacent to roads, shall be specified in the zoning by-law for the purpose of protecting the safety and efficiency of the road system. This setback shall apply to all municipal roads in the Planning District except provincial highways where the province establishes setback requirements. Setbacks for buildings and structures and access to Provincial Trunk Highways and Provincial Roads shall be in accordance with applicable provincial regulations and legislation.

2.9.9 Where there are existing or anticipated high volumes of truck traffic, the municipality may designate certain municipal roads as truck routes, in order to limit deterioration of the municipal road system and to minimize safety problems and nuisance factors within urban and rural residential areas. The designated truck routes will be identified as truck routes on a map and adopted as a transportation by-law for the municipality. These truck routes are intended to complement the provincial highway system as major traffic carriers and as such will be subject to the following considerations:

1. Truck routes shall receive priority consideration for maintenance and snow removal; and
2. Truck routes shall be designed to carry heavy farm traffic although restrictions may be placed on these roads at certain times of the year.

Provincial Roads and Highways

2.9.10 Commercial uses that primarily serve the travelling public may be permitted to locate adjacent to a provincial highways provided direct access to the highway system is discouraged and the efficiency and safety of the adjoining highway is not jeopardized.

2.9.11 Satisfactory storm drainage must be provided to service any development adjacent to the provincial trunk highways and provincial roads. Permission must be obtained from the applicable provincial authority to drain any water into the highway drainage system. Costs of any revisions to the existing drainage system, which are directly related to the development, will be the responsibility of the developer.

2.9.12 Where an area of development is bordered on one side by a major transportation corridor or facility such as a highway or rail line, new development should, where appropriate, be directed to the same side to avoid the need for local traffic to cross the corridor or facility.

2.9.13 Land uses that generate significant amounts of regional vehicular traffic and/or significant truck traffic will be encouraged to locate in proximity to major roadways, including provincial roads and provincial highway. However, direct access to the provincial highway system will be discouraged. Access to the provincial highway system should be via the municipal road system for these land uses.

2.9.14 Any development that is to occur within the controlled area of provincial roads and provincial trunk highways under provincial authority will be subject to approval by the applicable provincial authority.

2.9.15 Development near a provincial trunk highway or a provincial road shall be subject to the following design and siting criteria:

1. Development proposals that may impact the provincial highway network shall be reviewed by MTI;
2. Strip development along the highway whereby direct connections to the highway are relied upon for providing access to abutting properties, shall not be permitted;

3. Development that may have a detrimental impact on the safe operation of the provincial highway system shall not be allowed;
4. Subdivision / development will not be permitted in areas designated for highway widening or expansion unless provisions suitable to the province are made to accommodate future widening or expansion;
5. Developers may be responsible for the cost of highway improvements deemed necessary by appropriate provincial authority to accommodate a proposed development;
6. A permit is required from the applicable provincial authority for any new, modified or relocated access to the provincial highway network. A permit is also required for any construction/structure above, below or at ground level or change in use of land, structures and access within the control lines and control circles of these highways; and
7. A permit is required from the applicable provincial authority for any new, modified or relocated access to all provincial roads in the Planning District. A permit is also required for any construction/structure above, below, or at ground level within the controlled area of these highways.

Railways

2.9.16 Development on lands adjacent to existing active rail corridors in the Planning District should be adequately buffered from rail related uses and conform to the minimum setbacks required by applicable provincial or federal authorities.

Airports

2.9.17 Development on lands adjacent to existing airports or airfields that could impede or negatively impact their use and operation shall generally not be permitted. New development proposals should adhere to applicable regulations and legislation.

2.9.18 Development or land uses that could be hazardous to the occupants of land adjacent to existing airports or airfields due to regular airport operations will generally not be permitted. This policy specifically pertains to the Carman (South) Airfield located in 6-5-13W, and Friendship Field Airfield located in 6-5-24W.

2.10 ACTIVE TRANSPORTATION

Objectives

2.10.1 To develop and maintain active transportation infrastructure throughout the Planning District, such as the Community Pathway, and connect the Town of Carman with the RMs of Dufferin and Grey via an active transportation route.

2.10.2 To provide residents with active recreational opportunities and reduce reliance on private automobiles and transportation related greenhouse gas emissions.

Policies

The following policies shall guide development with respect to the provision of active transportation amenities within the Planning District:

- 2.10.3 Existing trail networks, including the Community Pathway, will be protected from development and extended when deemed necessary by the Planning District Board. The development of land in and around active transportation infrastructure within the Planning District may require a concept plan to determine whether it complies with the overall intent of this Development Plan.
- 2.10.4 Abandoned railway lines should be protected from development and land uses that may negatively impact their recreational capability. Should any transportation or utility corridor become redundant, consideration shall be given to converting such lands to public uses that may include or support multi-use of an extension of the active transportation network.
- 2.10.5 New development in the Planning District shall be encouraged to make provision for active transportation options or alternatives to private automobile use.

2.11 HAZARDOUS USES

Objective

To reduce and prevent adverse and nuisance impacts of incompatible land use and development.

Policies

The following policies shall guide hazardous uses in the Planning District:

- 2.11.1 Hazardous uses refer to facilities or developments, exclusive of railways and highways, which manufacture, handle, store or distribute hazardous materials. New hazardous use facilities are generally not encouraged within the Planning District. Any contemplated hazardous use should be separated from incompatible uses such as lands or buildings used primarily for human occupation or directed to an appropriately designated area such as the ***Industrial Policy Area***.
- 2.11.2 Where development of a potentially hazardous use is proposed, information may be required relating to the adverse impacts of the use such as the nature of any potential discharges, the nature of outside storage, the compatibility of surrounding land uses, and plans for buffering such activities from adjacent uses and human activities.

2.12 NATURAL AREAS

Objectives

- 2.12.1 To protect natural areas and habitats from incompatible or potentially incompatible land use activity/development where rare or endangered flora and fauna have received designation and protection under Federal or Provincial legislation.
- 2.12.2 To minimize impacts of development on aquatic ecosystems, wetland environments and riparian areas.
- 2.12.3 To recognize, protect and ensure the sustainability of provincial Crown lands and the development potential of these lands does not exceed the lands capability to support such activities and/or threaten the ecological integrity.

Policies

The following policies shall guide development with respect to natural areas and habitats in the Planning District:

- 2.12.4 Natural areas and habitats shall be protected from incompatible or potentially incompatible land use activity/development where:
 - 1. Rare or endangered flora and fauna have received provincial designation and protection in accordance with federal and provincial regulations and legislation;
 - 2. Lands have been designated as Protected under the Protected Areas Initiative;
 - 3. Lands have been identified as provincial park;
 - 4. Sensitive wildlife or aquatic habitat has been identified, or
 - 5. Private lands that have been voluntarily protected by landowners under in accordance with federal and provincial regulations and legislation.
- 2.12.5 Proposed developments located near waterways and water bodies that have the potential to alter, disrupt or destroy aquatic habitat; including the riparian area, will be referred to the applicable provincial authority for review.
- 2.12.6 Developments and the use of land adjacent to designated provincial parks and protected areas will be referred to the applicable provincial authority for review/comment to ensure that future development or changes in land use will not adversely affect the sustainability of the area or the resident flora and fauna.
- 2.12.7 Both the Development Plan and the Zoning By-Law maps will identify land designated by order-in-council and/or regulation by the province.
- 2.12.8 Significant natural areas and sensitive environmental areas shall be identified and protected, where the potential for human activities to stress the environment may require designating these activities/developments as conditional uses.

- 2.12.9 Where privately initiated habitat conservation land leases or land transfers are proposed, the applicable provincial authority will be encouraged to consult with the Planning District affected prior to approving the designation of a private habitat conservation area.
- 2.12.10 Inter-municipal co-operation is encouraged in the application and implementation measures to protect the Planning District's natural environmental resources.
- 2.12.11 Public access to natural areas will be encouraged; where feasible, to foster an appreciation for the enjoyment of the natural world. Access should not lead to levels of activity or development which will exceed the capability of the area to sustain the environment and ecosystem integrity. Where private land holdings are involved, access to these areas will be subject to the approval of the landowner.
- 2.12.12 Quality wetland habitats, including riparian areas where applicable, shall be protected to ensure continued waterfowl production.

3 LAND USE POLICIES

Part 3 provides objectives and policies for eight identified land use policy areas within the Planning District. Each of these policy areas are illustrated in the land use maps contained in Part 5 of this Development Plan.

3.1 AGRICULTURAL POLICIES

Agriculture is the dominant land use in the Planning District. Agricultural uses contribute to the quality of life, economic resilience, and sense of place within the Planning District, and must be protected to ensure their long-term viability. The preservation of prime agricultural land, or lower class land on which agriculture activities are dominant, and the fostering of the agricultural industry will be given the highest priority in light of the objectives and policies contained herein. Except as provided for elsewhere in this Development Plan, agricultural land will be retained in large parcels to maintain a viable base of agricultural lands and to provide maximum protection and flexibility for agricultural activities.

Objectives

- 3.1.1 To preserve the Planning District's natural assets including food-production lands for continued agricultural use, watersheds and natural habitat areas.
- 3.1.2 To protect designated agricultural lands by directing urban and non-farm rural residential uses to non-agriculturally designated lands.
- 3.1.3 To provide direction for livestock development within the Planning District, and ensure new operations or expansions to existing operations are planned to limit land use conflicts.

Policies

In addition to the general policies described in Part Two, the following objectives and policies shall guide agricultural uses and development in the Planning District:

Agricultural Designations

- 3.1.4 Agricultural uses shall be encouraged in areas designated **General Agricultural Policy Area**, and **Restricted Agricultural Policy Area** as identified on Map 1 of this Development Plan. The following policies guide planning and development in the designated agricultural areas.

General Agricultural Policy Area

3.1.5 All lands within the **General Agricultural Policy Area** shall be preserved or utilized for the widest range of agricultural activities, including livestock operations, excepting those lands and uses which meet the provisions contained herein. Uses that are not agricultural in nature, such as rural residential and recreational development will be kept to a minimum. Non-intensive recreational uses such as trails shall be permitted, whereas uses such as golf courses, playing fields and other intensive recreational uses shall be directed to other appropriately designated areas. To minimize the fragmentation of the agricultural land base, the minimum parcel size in the **General Agricultural Policy Area** shall be 80 acres.

Restricted Agricultural Policy Area:

3.1.6 Agricultural activities within the **Restricted Agricultural Policy Area** shall be limited to activities which do not have the potential to create land use conflicts with urban development within the Planning District. Examples of appropriate agricultural activities in this policy area would include cropping, market gardening, tree nurseries, or other legitimate specialized agricultural operations. To minimize the fragmentation of the agricultural land base, the minimum parcel size in the **Restricted Agricultural Policy Area** shall be 80 acres.

All Agricultural Policy Areas

Unless specifically noted, the objectives and policies contained herein will apply to both the **General Agricultural Policy Area** and **Restricted Agricultural Policy Area**.

3.1.7 Any non-agricultural uses shall be subject to the following criteria:

1. Other than residential uses as described in Section 3.3 of this Plan, only resource-related, public and institutional, and parks and open space uses may be permitted as non-agricultural uses.
2. Non-agricultural uses shall not restrict existing livestock operations or cropping practices;
3. Non-agricultural uses shall not cause expenses for road, drainage or other infrastructure services not generally related to local agricultural needs;
4. Non-agricultural uses shall not be located in a manner that may interfere with the use or expansion of established solid waste management sites, sewage treatment lagoons, or other private/public utilities and services;
5. Non-agricultural development should be directed away from prime agricultural land, viable lower class land and livestock operations; and
6. Home occupations will be accommodated, subject to compliance with the standards set forth in the zoning by-law, and provided they are compatible with the adjacent uses.

Existing Uses

- 3.1.8 Uses lawfully established prior to the adoption of this Development Plan, whether agricultural or non-agricultural, should be protected and new uses may be restricted, or may not be approved where they may conflict with these established uses.

Erosion

- 3.1.9 The Planning District Board shall support the protection of soil from wind and water erosion by encouraging the retention of existing and the development of new shelter-belts and other conservation measures.

Wastewater Management

- 3.1.10 All on-site wastewater management systems proposed in the agricultural areas shall ensure that the design and construction is suitable for the soil conditions and the lot size proposed for the development and shall comply with all requirements as per provincial regulations and legislation and must be registered with the applicable provincial authority prior to installation.

Protected Areas

- 3.1.11 Development may be prohibited in areas that have received designation or protection in accordance with applicable federal and provincial regulations and legislation. If development is permitted it shall be in accordance with the terms and conditions established by the applicable provincial authority.

Removal of Topsoil

- 3.1.12 The removal of topsoil, or other organic surface material on lands designated for agricultural use shall not be permitted unless approval has been granted by the Planning District Board. This is not intended to restrict excavation for the purposes of drainage ditches, dykes, road construction, building sites or similar work, or gaining access to aggregate and other quarry minerals.

Aggregate Resources

- 3.1.13 Development may be prohibited in proximity to identified aggregate resource deposits where it is deemed that the proposed development is an incompatible land use.

Livestock

- 3.1.14 For the purposes of this development plan by-law, a livestock operation means a permanent or semi-permanent facility or non-grazing area where at least ten (10) animal units of livestock are kept or raised either indoors or outdoors, and includes all associated manure collection facilities.

- 3.1.15 New or expanding livestock operations will be allowed within the **General Agricultural Policy Area**, shown on Map 1. In general, new or expanding livestock operations must be sited so as to minimize conflict with existing or planned urban, recreational or residential developments. All proposed new or expanding livestock operations involving 300 or more animal units must be processed as a conditional use and must be reviewed by the applicable provincial authority, or Technical Review Committee.
- 3.1.16 New or expanding livestock operations will be allowed within the **Restricted Agricultural Policy Area**, shown on Map 1. The **Restricted Agricultural Policy Area** is intended to protect existing urban centres, existing rural residential development, and environmentally sensitive areas along the Boyne River from the impact of livestock operations. To keep the land use conflict between livestock operations and non-compatible land uses to a minimum, new and expanding livestock operations will not be allowed to exceed a maximum size of three hundred (300) animal units within the **Restricted Agricultural Policy Area**.
- 3.1.17 New or expanding livestock operations will not be allowed within the **Village Centre Policy Areas**, within the **Rural Residential Policy Areas**, or the **Parks and Recreation Policy Areas** adjacent to Stephenfield Reservoir, as shown on Map 6. Additionally, new or expanding livestock operations will not be allowed on soils determined by detailed soil survey, in consultation with the province, to be Agricultural Capability Class 6, 7, or unimproved organic soils as defined under the Canada Land Inventory.
- 3.1.18 Within the **Restricted Agricultural Policy Area**, the replacement (due to modernization or fire) of livestock operations, established prior to the adoption of this by-law, at the same size and location may be permitted and the expansion of existing livestock operation will be considered based on the size and separation distances established in the zoning by-law.
- 3.1.19 The mutual separation distances between livestock operations and designated areas in the Planning District will be the same as the minimum separation distances provided for siting livestock in Part 5 of the *Provincial Planning Regulation*. These mutual separation distances will be established in the zoning by-law. The Planning District Board may, pursuant to *The Planning Act*, vary the separation distance provided in the zoning by-law.
- 3.1.20 No person shall develop or expand a livestock operation unless the Planning District Board or the designated employee or officer has approved the establishment or expansion.
- 3.1.21 An application for approval of the establishment or expansion of a livestock operation must be made to the Planning District Board, by the owner of the operation or by a person authorized by the owner, in a form and accompanied by any material and any fee established by the Planning District Board.

3.1.22 Applications for new or expanding livestock operations of **less than 300 animal units** will be processed in accordance with the following:

1. An application for the establishment or expansion of a livestock operation of less than 300 animal units shall be made to the Planning District Board or the designated employee or officer;
2. The Planning District Board shall not require a public hearing respecting an application proposing the establishment or expansion of a livestock operation of less than 300 animal units;
3. An application will not be approved unless the proposed livestock operation:
 - a. will be compatible with the general nature of the surrounding area;
 - b. will not be detrimental to the general health and welfare of the people living and working in the area or negatively affect other property or potential development in the area;
 - c. generally conforms to the applicable provisions of the Development Plan and zoning by-law;
4. The Planning District Board or the designated employee or officer may impose the following requirements on an approved application:
 - a. measures to ensure conformity to the applicable provisions of the Development Plan and zoning by-law;
 - b. one or both of the following measures intended to reduce odours from the livestock operation:
 - i. requiring cover on manure storage facilities; and/or
 - ii. requiring shelter belts to be established
5. require the applicant to enter into a development agreement regarding one or more of matters:
6. the timing of construction;
 - a. the control of traffic;
 - b. the construction and maintenance of roads, fencing, landscaping, shelter belts or drainage works; and/or
 - c. the payment of a sum of money to the Planning District Board to be used to construct any of the items mentioned in clause iii above.

3.1.23 Applications for new or expanding livestock operations of **300 animal units or more** will be processed in accordance with the following:

1. An application for the establishment or expansion of a livestock operation of 300 animal units or more shall be made to the Planning District Board. Upon receipt of an application, a copy shall be sent to the applicable provincial authority and forwarded to the Technical Review Committee for review as per *The Planning Act*;
2. The Technical Review Committee report shall be made available for review and a formal public hearing will be held in accordance with *The Planning Act*; and
3. After holding the hearing, the Planning District Board will make an order:
 - a. rejecting the application; or
 - b. approving the application, with or without conditions, if the proposed livestock operation:
 - i. receives a report from the Technical Review Committee which determines, based on available information, that the proposed operation will not create a risk to health, safety or the environment, or that any risk can be minimized through the use of appropriate practices, measures and safeguards;
 - ii. will be compatible with the general nature of the surrounding area;
 - iii. will not be detrimental to the health and general welfare of people in the surrounding area or negatively affect other properties or potential development in the surrounding area,; and
 - iv. conforms to the applicable provisions of this Development Plan and zoning by-laws.
4. The Planning District Board may impose the following conditions on an application:
 - a. measures to ensure conformity to the applicable provisions of this Development Plan and zoning by- laws;
 - b. measures to implement recommendations made by the Technical Review Committee; if a technical review is requested;
 - c. one or both of the following measures intended to reduce odours from the livestock operation:
 - i. requiring cover on manure storage facilities, and/or
 - ii. requiring shelter belts to be established
 - d. require the applicant to enter into a development agreement regarding one or more of matters:
 - i. the timing of construction;
 - ii. the control of traffic;
 - iii. the construction and maintenance of roads, fencing, landscaping, shelter belts or drainage works, and/or;
 - iv. the payment of a sum of money to the Planning District Board to be used to construct any of the items mentioned in clause iii above.

Subdivision for Residential Uses

3.1.24 The subdivision of land for residential purposes in the **General Agricultural Policy Area** and the **Restricted Agricultural Policy Area** may be considered subject to the requirements of this Plan and the zoning by-law, and only where the applicable criteria of the following circumstances are satisfied:

1. A single lot subdivision is proposed for a retiring farmer who wishes to subdivide an existing farm residence from the agricultural operation (that has been operating for a minimum of 5 years) and retain it for retirement purposes;
2. A single lot subdivision is proposed when a bona fide farmstead site that contains a farm residence that is rendered surplus due to the amalgamation of farm operations for purposes of farm enlargement;
3. A single lot subdivision that is contiguous with the existing farmstead site is proposed for an individual who significantly participates in the agricultural operation on an ongoing basis and derives an income from it;
4. A single lot subdivision is proposed for a parcel that is physically isolated by a creek, drain, road or natural land feature and is of a size and shape that makes farming of the land physically impractical;
5. A single lot subdivision is proposed from a well-defined yard site which is a minimum of 5 acres, is contained within a mature shelter-belt, and does not contain any pasture or cultivated land. The yard site must contain evidence of either a habitable farm dwelling or a well for domestic purposes. The proposed lot must be in compliance with provincial regulations for on-site wastewater management systems; and
6. A subdivision is proposed as infill within the boundaries of an existing rural residential cluster as identified on Map 1, or is proposed to establish a new rural residential cluster, whereas:
 - a. The lot/parcel being considered for subdivision must front on an existing all-weather municipal road;
 - b. Where there is an existing dwelling located on the lot being considered for subdivision, the dwelling shall be located in a way that would allow for further subdivision of the lot/parcel, taking into account that the new lot created and subject residual lot would meet the minimum requirements for onsite wastewater management systems, and cannot be flag shaped or of an irregular configuration;
 - c. The lot/parcel proposed for subdivision is constrained on three sides by lands (including roadways and well-established yard sites) that have not been farmed for a number of years;
 - d. The lot/parcel proposed for subdivision is of a size and shape that cannot easily be farmed because of the constraining lands;

- e. Any new and residual lots/parcels created as a result of the proposed subdivision will be a minimum of 2 acres and will be a size and shape that is generally consistent with other surrounding rural residential development; and
- f. All homes in the rural residential clusters are located within the designated agricultural areas, and as such, the separation distances for individual residences will apply for all existing, expanding or newly constructed livestock operations, unless approved through a Variance by the Planning District Board.

3.1.25 Expanding the boundaries of an existing rural residential cluster as identified on Map 1, or creating a new rural residential cluster, will require an amendment to this Development Plan.

3.1.26 The subdivision of land in the **General Agricultural Policy Area** and the **Restricted Agricultural Policy Area** for residential purposes under 3.1.25 shall also be subject to the following criteria:

1. A maximum of one (1) residential subdivision per original 80-acre title shall be permitted;
2. The proposed subdivision shall not be allowed on cultivated land and should be directed to tree covered areas or be located within a well-defined and existing mature shelterbelt that forms part of a farmstead site, not to generally exceed 10 acres, and must not be wasteful of agricultural lands;
3. The proposed subdivision must be capable of accommodating an on-site wastewater management system and have an adequate supply of potable water;
4. That municipal services such as drainage, school busing, fire protection shall be available to the subdivision site or can be provided without undue cost to the municipality;
5. The proposed subdivision must have legal access to a public road. Direct access to a provincial highway is discouraged. Access should be via an all-weather municipal road where service improvements and/or extensions are minimized;
6. The proposed subdivision location shall comply with the mutual separation distances between livestock operations and dwellings;
7. The proposed subdivision of large agricultural parcels should leave a residual parcel that complies with the minimum site area and width established in the zoning by-law; and
8. The proposed subdivision shall not be subject to flooding, erosion or bank instability as defined in Section 2.3.

Subdivision for Specialized Agricultural Uses

3.1.27 The subdivision of land for specialized agricultural uses in the **General Agricultural Policy Area** and the **Restricted Agricultural Policy Area** may be considered based on the following circumstances, and the requirements of the zoning by-law:

1. A single lot subdivision for specialized agricultural operations such as tree nurseries, apiaries, market gardens and other bona fide agricultural operations may be allowed on parcels of land that are less than the minimum area specified in the zoning by-law for general agricultural activities, provided the specialized operation has already been established, or if it is supported by a business plan or arrangements acceptable to the Planning District Board.

Subdivision for Commercial or Industrial Agricultural Uses

3.1.28 Commercial or Industrial Agricultural Uses should be directed toward the designated General Commercial or Industrial areas wherever practical and appropriate. If it is demonstrated that it is essential that it be located in an agricultural area, the subdivision of land for certain commercial or industrial agricultural uses in the **General Agricultural Policy Area** and the **Restricted Agricultural Policy Area** may be considered based on the following circumstances, and the requirements of the zoning by-law:

1. A single lot subdivision is proposed for an agricultural commercial or industrial use that provides services, machinery, equipment or goods specifically required by agricultural operations. The proposed agricultural commercial or industrial use may need to be supported by a business plan or arrangements acceptable to the Planning District Board; and
2. A single lot subdivision is proposed for an agricultural commercial or industrial use that provides storage or processes products grown or raised by an agricultural operation. The proposed agricultural commercial or industrial use may need to be supported by a business plan or arrangements acceptable to the Planning District Board.

3.1.29 The subdivision of land in the **General Agricultural Policy Area** and the **Restricted Agricultural Policy Area** for specialized agricultural uses and commercial and industrial uses shall be subject to the following criteria:

1. The location and siting of the proposed development will not create land use conflicts and where necessary, be directed away from prime agricultural land, and make provisions for adequate buffering or screening to mitigate against potential noise, dust or visual conflicts with adjacent uses. The zoning by-law will specify which uses will be considered as permitted, conditional, or prohibited uses;
2. The location and siting of the proposed development will be adjacent to existing developments of a similar nature and preferably be located in clusters rather than strips;

3. The location and siting of the proposed development will be restricted to the same side of a provincial highway facility where existing development has already occurred. Wherever possible, frontage roads or access roads will be utilized to limit direct access to the provincial highway system; and
4. Areas contemplated for uses listed above in 3.1.25 and 3.1.27 shall require a rezoning to an appropriate zone identified in the zoning by-law. These uses shall be listed as either permitted or conditional uses. Any dwelling constructed on the subject lands shall be accessory to the specialized agricultural or commercial and/or industrial agricultural use.

Subdivision for Boundary Adjustments

3.1.30 The subdivision of land for the readjustment of farm boundaries affected by rivers, streams, highways, large drains and other such features may be permitted in both the **General Agricultural Policy Area** and **Restricted Agricultural Policy Area**, if it is deemed necessary to accommodate agricultural practices. Boundary adjustments cannot create additional titles or be reorganized to create a new residential parcel, and are subject to compliance with the Zoning By-law and other applicable regulations. Consolidation of titles is recommended and will be required when the subdivision is on cultivated land or where the parcel is within the minimum separation distance of a livestock operation.

3.2 VILLAGE CENTRE POLICIES

The unincorporated villages of Roseisle, Graysville, Homewood, Fannystelle, and Haywood are existing village centres, and represent a concentration of population and services within the Planning District. The unincorporated villages support a variety of urban land uses including residential, institutional, commercial and limited industrial. They offer a greater variety of housing types, public services, recreation amenities, and municipal infrastructure when compared to the agricultural areas and rural residential areas. Compact development and a diversity of uses will be encouraged within the village centres to maximize existing investment, and to create thriving, self-sufficient growth areas that are integral to the Planning District's future and distinctive local character. The following objectives and policies will guide development in the unincorporated villages of Roseisle, Graysville, Homewood, Fannystelle, and Haywood.

Objectives

- 3.2.1 To promote compact growth and development in the unincorporated villages of Roseisle, Graysville, Homewood, Fannystelle, and Haywood and recognize their importance within the region.
- 3.2.2 To further develop the unincorporated villages as full-service, self-sufficient centres within the Planning District.
- 3.2.3 To ensure that a sufficient supply of residential land is available to meet present and future needs in each unincorporated village.

Policies

In addition to the general policies described in Part 2, the following policies shall guide development in the unincorporated villages within the Planning District:

Village Centre Designation

- 3.2.4 The unincorporated villages of Roseisle, Graysville, Homewood, Fannystelle, and Haywood do not have legal boundaries to define future growth limits, and as such, development limits shall be limited to the boundaries of the areas designated **Village Centre Policy Areas** on Map 1 and Maps 4, 5, 6, 8 and 9 respectively.

Village Centre Development

- 3.2.5 All development within the **Village Centre Policy Areas** will be subject to the following policies, and subject to the use and site requirements provided in the zoning by-law:
 - 1. An appropriate mix of residential, institutional, commercial, industrial, parks, recreation and open space uses, in quantities reasonably related to demand shall be encouraged;
 - 2. Development shall respect and protect known heritage resources;

3. Where new development is proposed, infrastructure such as roadways or piped services will be installed to municipal standards, and may require the proponent to contribute towards the cost of establishing new infrastructure needed to adequately service the development;
4. Lot sizes and densities shall be governed by the limitations of existing sewer and water services within each unincorporated village, and subject to compliance with the standards set forth in the zoning by-law. Where piped services are available, lot sizes may be smaller to provide for a higher density of development, and thus more efficient operation of piped services. New lots shall connect to municipal services where available; and
5. Where municipal wastewater services are not available:
 - a. Lot sizes should be of adequate size for accommodating on-site sewage disposal systems as determined by appropriate provincial regulations; and
 - b. Dwellings should be sited on the lot to allow for future infilling if municipal services are extended to the development area.

Residential Development

3.2.6 The following policies shall be used to guide the development of residential uses in the ***Village Centre Policy Areas***, subject to the use and site requirements provided in the zoning by-law:

1. Residential development shall be compact, contiguous and facilitate the efficient provision of services;
2. A variety of housing types including seniors or special purpose housing will be encouraged subject to compliance with the standards set forth in the zoning by-law, and in a manner that is compatible with adjacent uses;
3. Multiple lot residential subdivisions may require the developer to prepare a concept plan illustrating lot configuration and street layouts;
4. Infill development shall be encouraged on vacant lands;
5. Home occupations will be accommodated, subject to compliance with the standards set forth in the zoning by-law, provided they are compatible with the adjacent uses and the residential character of the property is maintained;
6. Mixed use residential development will be accommodated, subject to compliance with the standards set forth in the zoning by-law, and provided that they are developed in a manner considered compatible with adjacent uses; and
7. Secondary suites shall be encouraged as a way of increasing residential density, affordable housing, and extending family living options.

Institutional Development

3.2.7 The following policies shall be used to guide the development of institutional uses in the ***Village Centre Policy Areas***, subject to the use and site requirements provided in the zoning by-law:

1. Social or cultural institutions serving the entire Planning District shall be encouraged to locate in a central location within the unincorporated villages that is easily accessible to the entire community and minimize any negative impacts on residential areas;
2. Major institutional facilities requiring large tracts of land or major service extensions shall be required to undertake a concept plan illustrating lot configuration and street layouts;
3. Site area requirements for institutional uses shall be established in the zoning by-law;
4. Institutional uses which are more appropriately located in residential areas should give due consideration to minimizing any adverse impact on the surrounding residential environment; and
5. The design of institutional buildings should be in keeping with the character of the area.

Commercial and Industrial Development

3.2.8 The following policies shall be used to guide the development of future commercial and industrial uses in the ***Village Centre Policy Areas***, subject to the use and site requirements provided in the zoning by-law.

1. Commercial and industrial uses will be encouraged to locate within the ***Village Centre Policy Areas*** in order to support and strengthen the viability of the unincorporated villages where appropriate;
2. New commercial and industrial developments shall be encouraged to locate on existing lots of record. Where such development is not feasible on existing lots, new commercial and industrial lots can establish through the subdivision process;
3. Commercial and industrial uses which have the potential to generate activities that pose safety, health or nuisance hazards, may require large tracts of land or require reduced levels of service shall generally be encouraged to locate in the ***Industrial Policy Areas***;
4. Commercial and industrial development shall occur in such a manner as to minimize conflicts with adjacent land uses. Where commercial and industrial uses are adjacent to residential developments, adequate buffering and screening will be required as stipulated in the zoning by-law;
5. To prevent potential land use conflicts, industrial uses will be listed as a conditional use in the zoning by-law; and

6. Specialized small-scale operations such as market gardens shall be permitted within ***Village Centre Policy Areas***.

Parks and Green Space

- 3.2.9 Appropriately located parks and green space shall be encouraged in the ***Village Centre Policy Areas***.

Active Pedestrian Amenities

- 3.2.10 Active transportation through conveniently located and connected sidewalks, trails and pathways shall be encouraged in the ***Village Centre Policy Areas***. All new development shall be encouraged to make provision for active transportation options.

Livestock

- 3.2.11 Livestock operations shall not be permitted in the ***Village Centre Policy Areas***.

Subdivision

- 3.2.12 The subdivision of lands designated ***Village Centre Policy Areas*** may be considered provided the new lots conform to the policies above, and the requirements of the zoning by-law.

3.3 RURAL RESIDENTIAL POLICIES

Rural residential areas provide an alternative to urban living in the Town of Carman and the unincorporated villages in the RMs of Dufferin and Grey. It is recognized that there is a demand for rural residential development in the Planning District, however, it should be addressed in a sustainable manner. Sprawling, ill-planned rural residential development serviced by onsite wastewater management systems may not be sustainable over the long-term without a transition strategy that provides for the incorporation of municipal wastewater services. Policies promoting compact, clustered rural residential development are effective in addressing the issues associated with rural residential sustainability, while continuing to provide a choice and variety of housing options within the Planning District.

Objectives

- 3.3.1 To provide an adequate supply of rural residential lands, while ensuring the agricultural character of the Planning District is preserved.
- 3.3.2 To ensure rural residential development does not infringe upon prime agricultural lands, interfere with agricultural operations or the expansion of the Town of Carman.
- 3.3.3 To intensify rural residential development at locations where it currently exists in the Planning District.

Policies

In addition to the general policies described in Part Two, the following policies shall guide rural residential development in the Planning District:

Rural Residential Designation

- 3.3.4 Rural residential development shall only be allowed in areas designated as ***Rural Residential Policy Areas*** on Map 1 of this Development Plan.

Infill Development

- 3.3.5 Infill to areas designated ***Rural Residential Policy Areas*** will be encouraged before expanding or re-designating more lands for rural residential development.

Rural Residential Development

- 3.3.6 The following policies apply to rural residential development on lands designated ***Rural Residential Policy Areas***:
 1. Rural residential development shall provide a parcel size that will preserve the rural character while accommodating onsite wastewater management system according to appropriate provincial regulations;
 2. Rural residential development shall protect natural features such as creeks, tributaries, riparian areas, and retain existing tree cover wherever possible;

3. Rural residential development shall provide adequate surface drainage; and
4. Multiple-lot rural residential development will require a concept plan. Concept plans can describe phasing, cost of extending services, transportation impacts, school, and recreation opportunities. The applicant may also be required to undertake additional studies, such as Access Management Plans, by qualified professionals to demonstrate the land is suitable for the purpose for which the development is intended, as determined by the Planning District Board or the designated employee or officer, or the appropriate provincial authority.

Home Occupations

- 3.3.7 Home occupations will be accommodated within the **Rural Residential Policy Areas**, subject to compliance with the standards set forth in the zoning by-law, provided they are compatible with the adjacent rural residential uses, and the residential character of the property is maintained.

Future Municipal Services

- 3.3.8 As a component of a future servicing strategy, residential site and development standards, as established under the zoning by-law be considered, to ensure building locations on lots will enable, at a future date, the efficient re-subdivision of land to higher density to ensure the economic provision of municipal services.

Active Pedestrian Amenities

- 3.3.9 Where appropriate, the Planning District Board may request a public reserve to be added to new rural residential lots in the **Rural Residential Policy Areas** along the Boyne River to make provision for the expansion, or extension of the active transportation network.

Livestock

- 3.3.10 Livestock or livestock operations shall not be permitted in the **Rural Residential Policy Areas**.

Redesignation of Lands to Rural Residential Policy Areas

- 3.3.11 The redesignation of land to **Rural Residential Policy Areas** will not be permitted within the **General Agricultural Policy Area**. The re-designation of land to **Rural Residential Policy Areas** may be permitted in the **Restricted Agricultural Policy Area** subject to amending the development plan and provincial approval. Proposals to re-designate lands to support rural residential uses will be evaluated based on the on the following criteria:

1. That the supply of rural residential lots in the Planning District is no longer adequate to accommodate identified and justifiable demand over a five-year time frame;
2. That proposed new rural residential development be contiguous with existing designated rural residential areas or adjacent to an existing cluster of rural residential uses as identified in Map 1;

3. The proposed rural residential development is not located on cultivated agricultural land and is adequately separated from existing livestock operations;
4. That the proposed rural residential development can be adequately flood proofed and serviced to a rural residential standard without creating environmental or servicing concerns;
5. That the proposed rural residential development shall not impede the logical expansion of the Town of Carman;
6. That the proposed rural residential development must be capable of accommodating on-site wastewater management systems as determined by appropriate provincial regulations, have an adequate supply of potable water and have frontage and access to an existing municipal road or internal road; and
7. That the siting and design of the proposed development meets the standards contained in the zoning by-law and all other relevant regulations.

Subdivision

- 3.3.12 The subdivision of lands designated ***Rural Residential Policy Area*** may be considered provided the new lots conform to the policies above, and the requirements of the zoning by-law.

3.4 RESIDENTIAL POLICIES

Our neighbourhoods are where we connect to develop a common sense of community. Vibrant and healthy neighbourhoods are a defining element of the human ecology of our communities, where each of us is connected to, and affected by the welfare of our neighbours. The objectives and policies contained herein provide direction for creating and maintaining complete communities that are compact, active, age friendly, and provide a mix of housing types in the Town of Carman and the Local Urban Districts (LUDs) of St. Claude and Elm Creek.

Objectives

- 3.4.1 To ensure new developments are interconnected to reduce water use, energy consumption, and provide more direct relationships between where people, work, play and live.
- 3.4.2 To encourage infill and compact development, and discourage sprawl and leapfrog development that requires unnecessary infrastructure and servicing costs.
- 3.4.3 To provide a mix and diversity of housing choices, prices, and styles in close proximity to services and recreation opportunities.
- 3.4.4 To provide an adequate supply of residential lands for continued growth and development in the Town of Carman and LUDs of St. Claude and Elm Creek.

Policies

In addition to the general policies described in Part Two, the following policies shall guide residential development in the Planning District:

Residential Designation

- 3.4.5 Residential development shall be allowed in areas designated as **Residential Policy Areas** on Map 1 of the Development Plan. Development in the **Residential Policy Areas** shall be subject to the following policies, and the use and site requirements of the zoning by-law.

Infill Development

- 3.4.6 The following policies apply to infill residential development on lands designated **Residential Policy Areas**:
 - 1. Infill development on vacant residential lands shall be encouraged in order to maximize existing investment and to encourage compact and efficient land use pattern; and
 - 2. Infill development shall be compatible and consistent with existing neighbourhood character in terms of size, scale and setbacks.

New Residential Development

3.4.7 The following policies apply to new residential development on lands designated **Residential Policy Areas**:

1. New residential development should occur in a contiguous and orderly manner;
2. A suitable stock of serviced residential land should be available to satisfy current and anticipated housing demand over a long-term planning horizon;
3. Priority will be given to the development of lands that are already serviced;
4. Compact lot sizes and multi-unit development as an efficient use of land and infrastructure will be encouraged;
5. Where large multi-lot residential land developments are proposed, the Planning District Board may request the following: a secondary plan, concept plan, a traffic impact study, active transportation network plan, building design information, or any information they deem necessary in order to ensure a high-quality development;
6. New residential development should provide an adequate mix of greenspace, recreation areas, connect to active transportation infrastructure where possible, and make provision for future schools and institutional uses; and
7. Appropriate buffers between new residential development and incompatible uses will be required as determined by the Planning District Board. Buffers may include: fencing, landscaping, green space, or minimum building setbacks.

Housing Types

3.4.8 A variety of housing types that include single-unit, multi-unit, apartment, mobile home, and planned unit development may be accommodated.

Seniors and Special Purpose Housing

3.4.9 Seniors housing or special purpose housing such as nursing homes, group homes or residential care facilities will be accommodated, provided that they are developed in a manner considered compatible with existing and proposed residential development.

Mixed-Use Residential

3.4.10 Mixed use residential development will be accommodated, provided that they are developed in a manner considered compatible with surrounding residential development and uses.

Home Occupations

3.4.11 Home occupations will be accommodated, provided they are compatible with the adjacent residential neighbourhood and the residential character of the property is maintained.

Neighbourhood Commercial

3.4.12 Neighbourhood commercial uses may be located within the ***Residential Policy Areas***, provided that they are developed in a manner considered compatible with existing and proposed residential development.

Institutional Uses

3.4.13 The following policies shall be used to guide the development of institutional uses in the ***Residential Policy Areas***:

1. A variety of public institutional uses such as hospitals, schools, places of worship, and recreation facilities will be accommodated, provided that they are developed in a manner considered compatible with surrounding residential development;
2. Major institutional facilities requiring large tracts of land (5 acres or greater) or major service extensions shall be required to undertake a concept plan, at the discretion of the Planning District Board;
3. Institutional uses which are more appropriately located in residential areas should give due consideration to minimizing any adverse impact on the surrounding residential environment; and
4. The design of institutional buildings should be in keeping with the character of the area.

Secondary Suites

3.4.14 Secondary suites shall be encouraged as a way of increasing residential density, affordable housing, and extending family living options.

Active Pedestrian Amenities

3.4.15 Active transportation through conveniently located and connected sidewalks, trails and pathways shall be encouraged.

Parks and Green Space

3.4.16 Appropriately located parks and green space shall be encouraged.

Subdivision

3.4.17 The subdivision of lands designated ***Residential Policy Areas*** may be considered provided the new lots conform to the policies above.

3.5 COMMERCIAL POLICIES

The Town of Carman and LUDs of St. Claude and Elm Creek are the commercial hubs for the Planning District, and provide a diversity of services and employment for the surrounding region. The objectives and policies contained herein support a wide range of commercial as well as compatible institutional and multi-unit residential uses within the Planning District.

Objectives

- 3.5.1 To ensure the Town of Carman and LUDs of St. Claude and Elm Creek continue to develop as regional service centres for the Planning District and surrounding area.
- 3.5.2 To encourage a mix of commercial uses at appropriate locations in the Planning District.
- 3.5.3 To protect and promote the Town of Carman's downtown area as the central focus area for commercial, institutional and civic uses within the Planning District.

Policies

In addition to the general policies described in Part Two, the following policies shall guide commercial development in the Planning District:

Commercial Designations

- 3.5.4 Commercial development shall occur only within lands designated as **Central Commercial Policy Area** and **General Commercial Policy Area** in the Development Plan.

Location of Commercial Uses

- 3.5.5 New commercial uses and the expansion of commercial uses shall only occur within designated commercial areas and in a manner that preserves adjacent neighbourhood character.

Central Commercial Policy Area

- 3.5.6 The **Central Commercial Policy Area** shall be the principal commercial area within the Planning District, offering the greatest variety of commercial, institutional and civic uses and services. Development in the **Central Commercial Policy Area** shall be subject to the following policies, and the use and site requirements provided in the Zoning By-law:

Revitalization and Building Reuse

- 1. Revitalization and adaptive building reuse for commercial and mixed-use commercial shall be encouraged.

Streetscape and Urban Design

- 2. A high-quality streetscape and pedestrian environment shall be encouraged.

General Commercial Policy Areas

3.5.7 The **General Commercial Policy Areas** encompass all commercial areas outside of the designated **Central Commercial Policy Area** in the Planning District. Development in the **General Commercial Policy Areas** should not develop in competition to the **Central Commercial Policy Area**, and shall be subject to the following policies, and the use and site requirements of the zoning by-law:

Highway Commercial

1. Highway commercial uses that cater to the travelling public will be encouraged, provided they are developed in a manner that balances safe, convenient access and the maintenance of traffic flows along the arterial streets and highways. Where possible, access to highway commercial uses should utilize an internal road system to provide access.

Large Format Retail

2. Commercial uses that require sites to support large structures shall be encouraged to locate in the **General Commercial Policy Areas**.

All Commercial Policy Areas

The following policies apply to all commercial development on lands designated **Central Commercial Policy Area** and **General Commercial Policy Areas**, subject to the use and site requirements of the zoning by-law.

Permitted/Compatible Uses

Mixed-Use Commercial

3.5.8 Compact, mixed-use commercial development shall be encouraged and developed in a manner considered compatible with surrounding uses.

Residential Uses

3.5.9 Multi-unit residential uses may be allowed in designated commercial areas in the Town of Carman and LUDs of St. Claude and Elm Creek, provided the type and scale of the development is compatible with adjacent uses, and that appropriate measures are in place to mitigate any potential incompatibility between the uses.

Institutional Uses

3.5.10 A variety of public institutional uses such as hospitals, schools, places of worship, and recreation facilities will be accommodated in designated commercial areas in the Town of Carman and LUDs of St. Claude and Elm Creek, provided they are developed in a manner considered compatible with surrounding uses.

Parks and Green Space

3.5.11 Appropriately located parks and recreational uses may be located in the designated commercial areas.

Incompatible Uses

3.5.12 Commercial uses which may present undue nuisance or are deemed to be incompatible with surrounding uses shall be located in the ***Industrial Policy Areas*** and subject to the requirements of the zoning by-law.

Design Standards

Infill Commercial Development

3.5.13 Infill development on vacant commercial lands shall be encouraged in order to maximize existing investment and to encourage compact and efficient land use pattern.

Active Transportation

3.5.14 Active transportation through conveniently located and connected sidewalks, trails and pathways shall be encouraged in the designated commercial areas. All new development shall be encouraged to make provision for active transportation options.

Site Design

3.5.15 The Planning District Board shall encourage a high standard of appearance and maintenance for all new and existing commercial uses in the Planning District.

Buffers

3.5.16 Appropriate buffers between commercial development and incompatible uses will be required as determined by the Planning District Board. Buffers may include: fencing, landscaping, green space, or minimum building setbacks.

Parking

3.5.17 An appropriate amount of parking shall be provided for all commercial uses. Parking requirements shall be determined in the zoning by-law.

Technical and Servicing Requirements

Development Standards

3.5.18 Where commercial development is proposed, the Planning District Board and/or applicable provincial authority may request the following: a concept plan, traffic impact study, active transportation network plan, building design information, or any other information deemed necessary to ensure a high-quality development.

Services and Wastewater Management

3.5.19 New commercial uses or expansions to existing commercial uses in the Town of Carman and LUDs of St. Claude and Elm Creek shall be evaluated prior to approval to ensure there is adequate capacity within the Town or LUD's water and sewer systems. All new commercial uses in the Town of Carman and LUDs of St. Claude and Elm Creek within the **General Commercial Policy Areas** will be required to connect with municipal services. Where connection to municipal services are not feasible, on-site wastewater management systems may be permitted, subject to compliance with all applicable provincial regulations. New commercial uses or expansions to existing commercial uses in the RM of Dufferin or Grey within the **General Commercial Policy Areas** shall utilize on-site wastewater management systems, subject to compliance with appropriate provincial regulations, unless connection to municipal services can be arranged.

Subdivision

3.5.20 The subdivision of lands designated **Central Commercial Policy Area** and **General Commercial Policy Areas** may be considered provided the new lots conform to the policies above.

3.6 INDUSTRIAL POLICIES

Industrial uses play an important role in the Planning District, particularly with regards to agri-business and the regional economy. The policies contained herein provide direction for the industrial sector, helping to ensure compatibility with surrounding uses, and making provision for ongoing industrial development within the Planning District.

Objectives

- 3.6.1 To provide for a full-range of industrial uses within the Planning District.
- 3.6.2 To support the local economy, and provide areas for employment growth with the Planning District.
- 3.6.3 To develop and promote attractive, safe, and well-planned industrial areas serving the interests of the Planning District and the surrounding region.
- 3.6.4 To minimize or eliminate land use conflicts between industrial and other uses.

Policies

In addition to the general policies described in Part Two, the following policies shall guide industrial development in the Planning District:

Industrial Designation

- 3.6.5 Industrial uses and development shall be allowed in areas designated as ***Industrial Policy Areas*** on Maps 1 and 2 of the Development Plan. Development in the ***Industrial Policy Areas*** shall be subject to the following policies, and the use and site requirements of the zoning by-law.

Development Standards

- 3.6.6 To ensure orderly and well-integrated industrial development, the Planning District Board may request that a concept plan be prepared prior to subdivision or development approval for new industrial or expansion to existing industrial uses.

Mixed-Use Industrial

- 3.6.7 Commercial uses may be allowed within designated industrial areas provided the type and scale of the development is compatible with adjacent uses and that appropriate measures are in place to mitigate any potential incompatibility between the uses, and subject to compliance with the standards set forth in the zoning by-law.

Hazardous Uses

3.6.8 The following policies apply to potentially hazardous industrial uses on lands designated ***Industrial Policy Areas***:

1. Industrial uses and activities that may cause pollution to land or groundwater shall not be permitted;
2. Facilities that manufacture, handle or distribute dangerous materials shall not be permitted. Anhydrous ammonia storage or handling facilities shall not be located within the Town of Carman; and
3. Heavy industrial uses that are deemed to create nuisance or conflicts with adjacent lands should be directed to the ***Industrial Policy Areas*** within the Planning District.

Site Design

3.6.9 The Planning District Board shall encourage a high standard of appearance and maintenance for all new and existing industrial uses.

Relocation of Industrial Uses

3.6.10 In the interest of public safety, the Planning District Board shall encourage and help to facilitate the relocation of existing industrial uses to lands designated for this purpose as development proposals come forward.

Services and Wastewater Management

3.6.11 New industrial uses or expansions to existing industrial uses in the Town of Carman and LUDs of St. Claude and Elm Creek shall be evaluated prior to approval to ensure there is adequate capacity within the Town or LUD's water and sewer systems. All new industrial uses in the Town of Carman within the ***Industrial Policy Areas*** will be required to connect with municipal services. Where connections to municipal services are not feasible, on-site wastewater management systems may be permitted, subject to compliance with all applicable provincial regulations. New industrial uses or expansions to existing industrial uses in the RMs of Dufferin and Grey within the ***Industrial Policy Areas*** shall utilize on-site wastewater management systems, subject to compliance with appropriate provincial regulations.

Redevelopment of Existing Brownfield Sites

3.6.12 The redevelopment of existing brownfield sites will be prioritized over designating new industrial lands.

Subdivision

3.6.13 The subdivision of lands designated ***Industrial Policy Areas*** may be considered provided the new lots conform to the policies above.

3.7 PARKS AND RECREATION POLICIES

Parks and open space uses are vital to the health and well being of the Planning District. The policies contained herein provide direction for establishing new park spaces and recreational amenities, as well as supporting infrastructure, within the Planning District.

Objectives

- 3.7.1 To provide parks and recreation areas that support a variety of passive and active recreation uses throughout the Planning District.
- 3.7.2 To ensure that parks and recreation development is harmonious with the natural environment, and in keeping with local character.
- 3.7.3 To preserve lands with aesthetic, environmental, heritage, or civic significance for the enjoyment of present and future generations.

Policies

In addition to the general policies described in Part 2, the following policies shall guide parks and recreation development in the Planning District:

Parks and Recreation Designation

- 3.7.4 Parks and recreation areas shall be designated ***Parks and Recreation Policy Areas*** in this Development Plan. Development in the ***Parks and Recreation Policy Areas*** shall be subject to the following policies, and the use and site requirements of the zoning by-law.

Park Typologies

- 3.7.5 A variety of parks and recreation areas shall be encouraged in the Planning District. Parks and recreation areas will range from small neighbourhood scale parks to regional scale parks such as King's Park in the Town of Carman, Stephenfield Provincial Park in the RM of Dufferin, or Mile 60 Park in the RM of Grey.
- 3.7.6 Parks and recreation areas shall support a variety of passive and active recreation activities.

Site Design

- 3.7.7 The Planning District Board shall encourage a high standard of appearance and maintenance for all new and existing parks and recreation areas in the Planning District. Parks and recreation areas should be designed to support active transportation and universal accessibility, and be linked with active transportation networks, such as the Community Pathway, wherever possible.

Development Standards

3.7.8 Where parks and recreational development is proposed, the Planning District Board may request the following: a concept plan, traffic impact study, active transportation network plan, building design information, or any other information deemed necessary to ensure a high-quality development.

Recreational Uses

3.7.9 A variety of uses such as public and private recreation facilities will be accommodated, provided they are developed in a manner considered compatible with surrounding uses.

Active Pedestrian Amenities

3.7.10 Active transportation through conveniently located and connected sidewalks, trails and pathways shall be encouraged on lands designated ***Parks and Recreation Policy Areas***.

Waterways

3.7.11 Parks and recreation development shall protect waterways, water bodies, and their adjacent riparian areas.

Subdivision

3.7.12 The subdivision of lands designated ***Parks and Recreation Policy Areas*** may be considered provided the new lots conform to the policies above.

3.8 FRINGE AREA POLICIES

Fringe areas within the Planning District have been identified recognizing opportunities for development along municipal boundaries and to encourage inter-municipal cooperation. The policies contained herein provide guidance for the Planning District to pursue growth and development opportunities that emphasize coordinated service delivery.

Objectives

- 3.8.1 To ensure development occurs in a seamless and sustainable manner.
- 3.8.2 To support cost effective and coordinated service delivery over municipal boundaries.
- 3.8.3 To promote a cooperative approach to inter-municipal development, based on sound planning principles.

Policies

In addition to the general policies described in Part 2, the following policies guide planning and development within each of the designated ***Fringe Policy Areas*** as identified on Map 3.

Secondary Plans and Concept Plans

- 3.8.4 All development within the ***Fringe Policy Areas*** will require either a concept plan or a secondary plan to guide the orderly development of the fringe area. A concept plan, to be submitted and approved by the Planning District Board, will be required when the proposed development is of a scale that affects less than 25% of the total land area in the identified fringe area. A secondary plan will be required when the proposed development is of a scale that affects 25% or more of the total land area in the identified fringe area and must be approved by the Planning District Board and the appropriate authority.

Subdivision and Rezoning

- 3.8.5 Subdivision applications within an identified fringe area shall require an approving resolution of support from both member municipalities, and such resolution of support shall not be unreasonably withheld, provided the conditions set forth in this Development Plan are met. Rezoning to an appropriate zone contained within the zoning by-law will also be required. Subdivision and rezoning can occur concurrently with the approval of the concept plan or secondary plan as required.

Development Standards

- 3.8.6 Development and servicing standards in the identified fringe areas shall be based on the urban standard of the Town of Carman, to ensure development is seamless and compatible with existing development. New development in the subject fringe area shall contribute toward the provision of community services such as recreation, employment, utilities, and emergency and health services.

Service Sharing Agreements

3.8.7 A service sharing agreement shall be established prior to development in the identified fringe area between the RM of Dufferin and the Town of Carman. This service sharing agreement can deal with, but is not limited to the following:

1. Garbage collection
2. Snow clearing and road maintenance
3. Water and sewer services
4. Water and sewage treatment
5. Waste disposal (landfill)
6. Drainage maintenance
7. Paved streets (curb and gutter)
8. Recreation and fire services

Tax Sharing Agreements

3.8.8 A tax sharing agreement shall be developed whereby municipal revenues from new development in the identified fringe area shall be deposited into one account for each agreement administered by both municipalities for the purposes of supporting infrastructure improvements in the identified fringe area.

Dispute Resolution

3.8.9 An inter-municipal dispute resolution procedure should be adopted by the Planning District Board within one year of the adoption of this Development Plan.

Cooperative Boundary Adjustments

3.8.10 ***Fringe Policy Areas*** are subject to a cooperative boundary adjustment agreement negotiated between the two concerned municipalities that includes a clause describing a certain time period within which the developed land will be incorporated into the Town of Carman.

4 IMPLEMENTATION

4.1 ADOPTION, REVIEW AND AMENDMENT

Adoption of this Development Plan by the Planning District Board and the Minister of Municipal and Northern Relations will give this Development Plan the force of law. Once adopted, no development or land use may be carried out within the area affected by the Development Plan that is inconsistent with the policies set forth herein.

The Development Plan should be reviewed periodically and revised if necessary to anticipate and respond to changing conditions within the Planning District. The Development Plan may be amended at any time when considered appropriate or necessary by the Planning District Board. *The Planning Act* provides that a Municipality can set out a date by which the Planning District Board must complete a review of the Development Plan. It is the intent of the Planning District to carry out a review of the Development Plan no later than five (5) years after the effective date of the previous review.

4.2 ZONING BY-LAW

The goals, objectives and policies contained herein are generally implemented through the zoning by-law of the member municipalities. Following adoption of this Development Plan, the member municipalities of the Planning District are required to enact a zoning by-law which will set out specific regulations for land use and development. The respective zoning by-law will designate zoning districts for certain types of uses. Permitted and conditional uses and development standards are prescribed for each zone. The zoning by-law must generally conform to a Development Plan adopted for the Planning District. The objectives and policies in this Development Plan provide guidance to the Planning District Board when preparing or amending their respective zoning by-laws.

4.3 SECONDARY PLANS

The Planning District Board may adopt, by by-law, a secondary plan to provide more guidance on development related issues. A secondary plan can deal with objectives and issues in any part of the Planning District or either member municipality, without limitation, on matters regarding:

1. any part of this Development Plan;
2. dealing with subdivision, design, road patterns, building standards, or other land use and development matters; or
3. dealing with heritage resources, sensitive lands, and other social factors such as economic development.

4.4 SUBDIVISION APPROVAL

Proposals involving the subdivision of land for individual or multiple lot development will be subject to a review by the provincial approving authority, the Planning District Board, and certain provincial government departments and agencies. This process provides an opportunity for development proposals to be evaluated in accordance with the provisions of this Development Plan. A subdivision cannot proceed without compliance or support from the provisions of this Development Plan, approval of the Planning District Board and the provincial approving authority. The Planning District Board and/or the provincial approving authority may attach conditions to a subdivision approval in

accordance with *The Planning Act*.

4.5 DEVELOPMENT AGREEMENTS

Approval of subdivisions and zoning amendments can be conditional upon entry into a development agreement that protects the interests of both the applicant and the municipality. A development agreement on a subdivision deals with the responsibilities of the applicant and the municipality in providing services to the land in question. A development agreement on a zoning amendment may deal with such issues as the use of the land, the siting of buildings, the installation of services and the provision of open space.

4.6 DEVELOPMENT PERMITS

New development generally requires a development permit issued by the member municipality. Before a permit is issued, proposals will be reviewed to determine conformance with this Development Plan and municipal zoning by-laws.

4.7 DEVELOPMENT OFFICER

The Development Officer or designated employee may be authorized to issue development permits, zoning memoranda, non-conforming certificates and other similar documents and allow minor variations to the requirements of a zoning by-law.

4.8 ACQUISITION AND DISPOSAL OF LAND

The municipality may acquire an interest in land or sell, lease or otherwise dispose of land for the purpose of implementing this Development Plan.

4.9 ADOPTION OF OTHER BY-LAWS

Land development and land use proposals for individual building projects are also subject to the provisions of other municipal by-laws, such as building by-laws, lot grading by-laws, building safety and property standards bylaws, licensing by-laws, and the Manitoba Building Code. These by-laws and regulations not only complement the zoning by-laws, but set out the terms, conditions and procedures upon which building permits may be issued. Through the building by-laws and regulations, the Planning District Board can establish the minimum standards of construction, maintenance and occupancy which new and renovated buildings have to meet in order to protect the safety and health of the public.

4.10 SPECIAL STUDIES AND CONCEPT PLANS

Proponents may be required to undertake and submit special studies or concept plans as part of the approval process for certain development proposals. Engineering or other professional studies may be required for development proposed for lands affected by natural hazards, endangered species, potential for groundwater or surface water pollution, and general risk to health, the environment and property. Such plans should include but are not limited to: drinking water management plans, wastewater management plans, infrastructure capacity assessments, geotechnical analysis, environmental assessment and impact analysis, soil suitability analysis, drainage plans, transportation assessments, access management plans, and impact analysis. Detailed concept or secondary plans may also be required to direct the location, nature and timing of development in a manner that is consistent with the intent of this Development Plan. In addition to the previously mentioned special

studies, Concept Plans can provide information with regard to the following:

1. Schematic layout of future roadways, with provisions for integration in a safe and efficient manner with other existing and anticipated roadways in the area, and in conformance with accepted engineering standards;
2. Schematic arrangement of building lots, with lot sizes that are appropriate for the nature of the anticipated development;
3. Conceptual layout of buildings and landscaping;
4. Location and size of proposed buffers, parks and open spaces;
5. Sufficiently detailed contour information to evaluate slope and drainage conditions;
6. Schematic design of the various utility and service systems anticipated within the development area, such as hydro, natural gas, telecommunication, storm drainage, water supply and wastewater systems;
7. Where appropriate, an assessment of the impact of the proposed development on the environment.

4.11 PUBLIC WORKS

The capital works program and public improvements of the municipality should conform to the policies set out in this Development Plan. This is an important implementation tool since a municipality may influence the rate and direction of growth through the provision of municipal services to land.

4.12 CAPITAL EXPENDITURES

Member Councils, the Planning District Board, other levels of government, school boards, health authorities, and all other agencies with a stake in development in the Planning District should consult the Development Plan when revising capital expenditure programs to be consistent with this Development Plan.

4.13 STRATEGIC PLANS FOR ECONOMIC DEVELOPMENT

As outlined in *The Municipal Act*, municipalities may adopt a strategic plan for economic development. Strategic plans should be consistent with this Development Plan. Communities should also take into account and build upon existing or proposed community vision statements and action plans, prepared as part of the community round table process, to ensure consistent objectives, policies and programs.

4.14 MUNICIPAL COOPERATION

Implementation of the Development Plan may benefit from or require cooperation between one or more municipalities. *The Municipal Act* provides for tax sharing agreements, service sharing agreements, and cost sharing agreements between municipalities.

5 LAND USE MAPS

The Land Use Policy Maps attached to this Development Plan are intended to provide the outlines of approximate boundaries of land use designations and / or locations thereof. There may be instances where exact boundaries will be determined by land ownership, for example. In these cases, precise boundaries or locations will be established in the zoning by-laws.
